

introduces the intelligent **COMPUHETERODYNE**.[®]

A new generation of Radar Detectors has been created by BEL scientists. For the first time, a Microprocessor Computer has been integrated with Superheterodyne technology. Compuheterodyne seeks out police radar with superior reception and intelligent analysis.

The smallest X-K with effective sensitivity. Only 3 3/4 x 1 1/2 x 3 3/4

Dash or visor mount

Also introducing the **COMPACT Compuheterodyne REMOTE MODELS**

Shadow VI EXECUTIVE

Sub-Compact Control: 3/4" Thin x 1 1/2"H x 3 3/4"W
Compact Antenna: 1 1/2"H x 3 3/4"W x 4"L
Wired, with quick disconnect to prevent loss.

Shadow V SUPER TRUCKER

Sub-Compact Control: 1 1/4"Thin x 1 1/2"H x 3 3/4"W
Compact Antenna: 2 7/8"H x 3 7/8"W x 4 5/8"L
Wireless, quick removal to prevent loss.

811
MICRO EYE VIII TRUCKER
Compuheterodyne

Compuheterodyne is the result of integrating Microprocessor signal processing, Superheterodyne circuitry and our exclusive solid die cast Gunn Oscillator and Horn Antenna assembly.

MORE range and will detect fringe signals from around curves or over hills more reliably.

MORE selective and no false alarms from electrical interference.

MORE audible sound. Truckers and car drivers will appreciate the multiple pitch.

The smallest and most sensitive dash/visor detector in the world
Negative or positive ground.
