THE FAST 500 CRITERIA

The Fast 500 is compiled from three sources: Deloitte & Touche's 22 regional U.S. and Canadian Fast 50 programs, nominations submitted directly to the Fast 500, and public company database research. To be considered for the Deloitte & Touche Technology Fast 500, a company must meet these four basic criteria:

1. Be a technology company, defined as a company that develops proprietary technology that contributes to a significant portion of the company's operating revenues, manufactures a technology-related product, or devotes a high percentage of effort to research and development of technology.
2. Meet minimum operating revenue requirements:
 - 1995 operating revenues must be at least \$50,000 for U.S. companies and \$75,000 CD for Canadian companies
 - 1999 operating revenues must be at least \$1 million for both U.S. and Canadian companies
3. Be in business a minimum of five years.
4. Be headquartered in the U.S. or Canada.

TECHNOLOGY FAST 500

500 Who Have Arrived

They boldly innovate technologies and business strategies. Their advancements drive entire industries to the next level. They're the Deloitte & Touche Technology Fast 500.

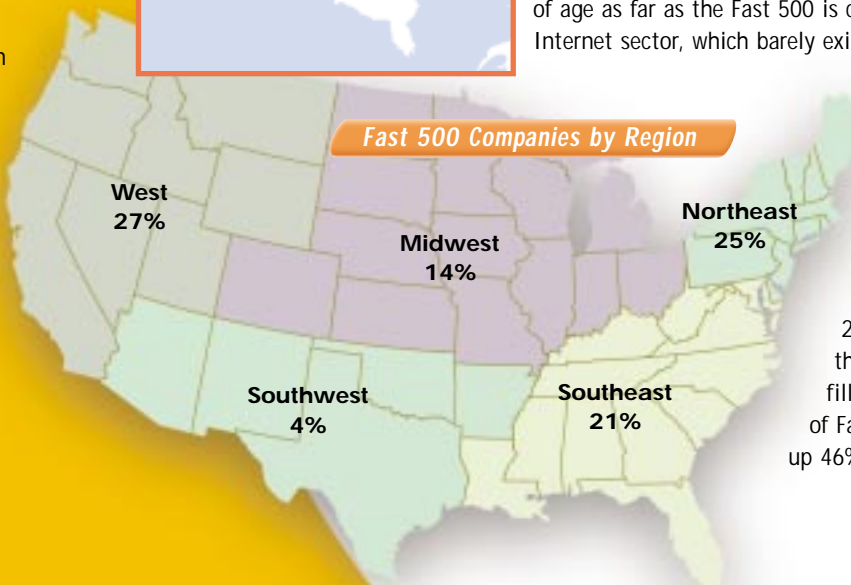

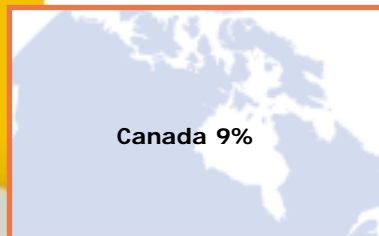

The Deloitte & Touche Technology Fast 500 serves as a competitive benchmark for the industry's leaders by celebrating the fastest-growing technology companies in the U.S. and Canada.

This year's Fast 500 averaged a five-year percentage revenue growth rate of 3,956%. The top five Fast 500 companies grew by more than 59,000%.

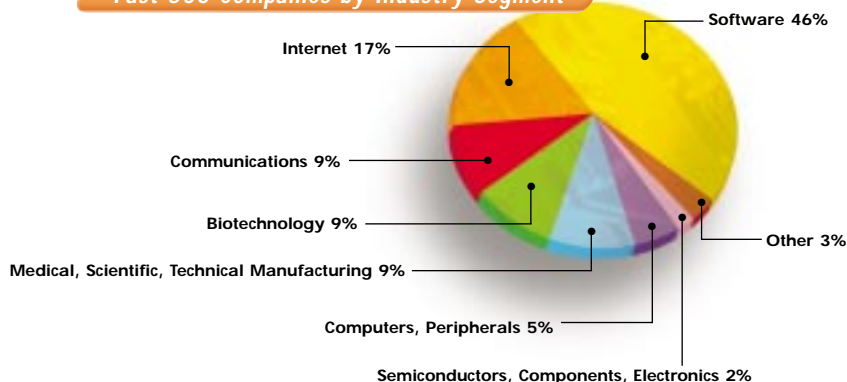

The big news for 2000 is that the Internet has come of age as far as the Fast 500 is concerned. The Internet sector, which barely existed five years ago,

now comprises 17% of the Fast 500 field, up from just 9% in 1999.

Internet companies may dominate the Fast 500 in the coming years, but in 2000, as in years past, the software sector filled the largest share of Fast 500 slots, making up 46% of the list.

Fast 500 Companies by Industry Segment

Taking the top honors in the 2000 Fast 500 rankings is Primus Telecommunications Group, a nimble company that parlayed its international telecommunications network into an Internet gold mine. Primus' revenues leaped from \$1 million in 1995 to over \$800 million in 1999, for an impressive 71,257% growth spurt.

Fast 500 'Firsts'

The Internet Makes a Splash. The hotly competitive Internet sector, made up of companies with unique technology or software developed specifically for use with the Internet, made its best showing yet on the Fast 500. The number of Internet companies on the Fast 500 nearly doubled from last year. The Internet's influence is obvious in the growth of other companies as well, including most of the top five Fast 500 companies.

The West Cedes the Top Spots. Proving that the pioneers of the New Economy are no longer confined to the West, the top five companies hail from Virginia, Kansas, New York and Atlanta. It's the first time in the Fast 500's six-year history that none of the top five (and only three of the top 10) are in the West. That doesn't mean the West is out of the running. In fact, 27% of the winners—the largest share—are in the West. Coming in a close second is the Northeast with 25%. The two regions' positions were reversed last year.

Canada Stakes a Claim. Canada's technology community has a long history of innovation. It's not surprising, then, that the Canadians made the most of their Fast 500 debut this year by accounting for 9% of the winning companies. Two of the top 20—Pivotal Corp. and Stratos Global Corp.—are Canadian.

COMPANIES TO WATCH

Staying Power

Five companies have weathered shifting market trends and economic fluctuations to master a remarkable staying power. We salute these companies for being Fast 500 winners every year since the program's inception in 1995:

America Online – Dulles, VA

iBaset – Lake Forest, CA

Intermedia Communications – Tampa, FL

MRV Communications – Chatsworth, CA

VERITAS Software Corporation – Mountain View, CA

Fast Approaching the Fast 500: The Rising Stars

In technology, the pace of change gets faster every year. That's why we've added a category to recognize technology companies that are quickly making a name for themselves. They have met the same criteria as the Fast 500, except they have been in business a minimum of three years but, less than five years. We expect to see these Rising Stars on the Fast 500 very soon.

Headquarters: McLean, VA

Five-Year Revenue Growth: 71,257%

Paul K. Singh, Chairman & Chief Executive Officer

**PRIMUS TELECOMMUNICATIONS GROUP, INC.**

How do you grow by more than 70,000% in five years? Primus Telecommunications (NASDAQ: PRTL) made that leap by anticipating opportunities and being ready before those opportunities came knocking. In 1995, Primus was reselling voice long-distance services. Eighteen months later, Primus had its own global telecommunications network in place to carry its customers' traffic.

"Next, our goal was to become a \$1 billion-plus company by 2002," recalled CEO Paul Singh. "We achieved that goal in 1999." Primus saw gold in the deregulating telecommunications markets and quickly established operating units in targeted regions throughout the world. With its operating units and network in place, Primus entered the ISP market.

Now comes the latest Primus goal: to become a \$10 billion Internet/data company. Last year the company introduced its iPrimus global initiative to build on its existing ISP business and network infrastructure. As part of that effort, Primus also offers Web hosting and application service provider (ASP) services, content distribution and streaming media, and ATM+IP-managed bandwidth via Primus's own network.

How will Primus pull this off? As it did five years ago, Primus' solid foundation should serve it well. "We've already invested a lot of money to build a solid infrastructure on a global basis," said Singh. "Now it's a matter of leveraging existing customers and existing distribution and sales channels."

www.euronetworldwide.com

Headquarters: Leawood, KS

Five-Year Revenue Growth: 66,790%

Michael J. Brown, Chairman & Chief Executive Officer

EURONET WORLDWIDE INC.

Euronet Worldwide Inc. (NASDAQ: EEFT) may be headquartered in America's heartland, but, according to CEO Michael Brown, "Our heart and soul grew up in Europe." That's where Euronet's network of automated teller machines (ATMs) reside, and it's where Brown expects the company's new wireless banking technology to take off.

Euronet provides banks and retailers with an infrastructure for connectivity and financial transaction processing. Euronet's ATM network is the largest in Europe and more than half of its 450 employees are based there. Now Euronet is leveraging that strong presence overseas to conquer the wireless mobile commerce market. According to Brown, "With our new products, the service providers can connect to the banks and allow customers to use a mobile phone to conduct the same banking transactions that they conduct at an ATM." Europeans are ahead of the U.S. in adopting mobile phone technology. There are already 250 million GSM mobile phones outside the U.S. compared to about 84 million in the U.S.

To what does Brown attribute Euronet's skyrocketing revenue growth? "We're a leader in this industry which is growing tremendously year after year," he said, adding that the key to Euronet's ongoing success is its European roots. "Euronet was founded in Hungary. Understanding this market has given us the knowledge to grow our business in other markets in Europe and around the world."

www.247media.com

Headquarters: New York, NY

Five-Year Revenue Growth: 59,118%

David Moore, Chief Executive Officer & Co-Founder

**24/7 MEDIA**

If the Web is becoming an advertising-driven medium, then 24/7 Media (NASDAQ: TFSM) is one of the engines behind that drive. 24/7's servers deliver everything from banner ads to advertiser-sponsored content to more than 4,000 Web sites globally. The company also boasts the world's largest permission-based e-mail database for delivering banner and e-mail ad campaigns.

Established in 1995, the company has acquired its way to a leadership role in Web-based interactive marketing. "In order to grow even faster than the Web was growing, we felt that we'd have to continue to do research and find the right acquisitions. To date we've done nearly 20 since forming the company," said CEO David Moore.

24/7 continues to keep pace with the Web, offering a broadband back office management product and services to help clients reach consumers who are connected to the emerging wireless Web. "We think the wireless device is one of the next important mediums of the 21st century," said Moore, who notes that 24/7 developed the first ad server for WAP-based cell phones.

Can 24/7 continue the growth spurt that took it from revenues of \$152 thousand in 1995 to \$90 million in 1999? According to Moore, "We're the only company positioned to deliver both e-mail and advertising across the Internet, via broadband and wireless, and we do it through one integrated platform."

www.razorfish.com

Headquarters: New York, NY

Five-Year Revenue Growth: 54,445%

Jeffrey Dachis, President & Chief Executive Officer

four

RAZORFISH, INC.

Razorfish has made a long swim upstream since its days as a Web site design firm. After establishing Razorfish as one of Manhattan's most stylish and trend-setting Web design shops (with clients like Time-Warner's Pathfinder), founders Jeffrey Dachis and Craig Kanarick guided the firm into more complex waters.

Today Razorfish is a leading digital services company that provides integrated e-business solutions. Razorfish has managed to stand out in the crowded services field through strong organic growth and by making strategic acquisitions. These measures have enabled Razorfish to offer everything from branding strategies, to back-end systems integration, to broadband solutions, to applying its design acumen, to wireless Web site applications. In the process, Razorfish's client roster has grown to include The U.S. Navy, Microsoft, Charles Schwab and Real Networks.

Not surprisingly, Dachis credits his company's staying power to Razorfish's focus on harnessing digital technologies, as well as its versatility and skill in reading industry trends. "We attribute our expansive growth to our ability to adjust to industry demands," he said. He also credits another factor. Acknowledging that Razorfish has one of the lowest employee turnover rates in an industry known for its job-hopping, Dachis added, "Ultimately, our 2,000 employees are responsible for our success."

www.iss.net

Headquarters: Atlanta, GA

Five-Year Revenue Growth: 45,226%

Thomas Noonan, Chief Executive Officer

INTERNET SECURITY SYSTEMS

Internet Security Systems (NASDAQ: ISSX) CEO Tom Noonan has an unabashed admiration for his 1,000-plus employees. "The most important differentiating factor between ISS and its competitors is our people," he said. "There is passion, spirit and vision at the core of our product development. They're almost like artists in the way they develop and handle the products." Apparently ISS employees are equally loyal. In an industry with an average employee turnover rate of 20%, ISS's turnover is less than 2%.

ISS provides total information security management for networks, servers, applications and desktops. The company's technology identifies network security problems and recommends corrective actions. As far as ISS is concerned, the Internet and corporate networks are synonymous from a security standpoint. "Every computer on a network, whether in a government agency or a corporation, and every individual computer at home, is attached to the Internet. This is the reason security is such a big problem," explained Noonan.

ISS expects its revenues to remain strong by maintaining a strong leadership team and a clear vision for the future. In the words of Noonan, "Our long-term vision is to protect networks from a remote location. We want to be the ADT of the Internet."

five

Technology Fast 500 CEO Summit. Every year, top-tier executives from the fastest-growing technology companies, industry experts who've helped shape the New Economy and leading business theorists gather at the Fast 500 CEO Summit to listen and collaborate for two days. It's an action-packed 48 hours of speakers, thought-provoking panel discussion, and productive networking, interspersed with a healthy dose of fun. **All current and former Technology Fast 500 winners are invited to attend.** This year's CEO Summit will be held from May 30 to June 1, 2001 at the Four Seasons Resort Aviara, Carlsbad, California.

Visit www.fast500.com for additional program information or to complete an online nomination form for 2001. Also, visit us to learn about our Technology Fast 50 programs in other countries.

DELOITTE & TOUCHE, one of the nation's leading professional services firms, provides assurance and advisory, tax, and management consulting services through 30,000 people in more than 100 U.S. cities. The firm is dedicated to exceeding the expectations of its clients and its people. Known as an employer of choice, Deloitte & Touche has been recognized as one of the "100 Best Companies to Work for in America" by Fortune magazine. Deloitte & Touche is part of Deloitte Touche Tohmatsu, one of the world's leading professional services firms, with more than 90,000 people in over 130 countries.
