INTRINSYC PROVIDES COMDEX UPDATE, ANNOUNCES AGREEMENTS

November 20, 1997. Intrinsic Software, Inc. (the “Company”) is pleased to announce that its presence at the Comdex Convention this week has resulted in significant industry exposure to the Company’s products and technologies, specifically its Windows[®] CE[®] based Rainbow[®] web technologies and Integration Expert[®] development tools. For a live demonstration of Rainbow at the booth (10:00am to 5:00pm PST for the remainder of this week only), point any web browser to <http://208.129.237.212/bgi/cambgi.dll> and a digital camera connected to a local Windows CE host will take a live picture of customers at the booth and will then send the image over the internet via Rainbow to your desktop PC.

Initial agreements with two Fortune 100 companies, who are major manufacturers of consumer electronics and office products, have been signed that lay the ground work for integrating Windows CE and Rainbow technologies into a number of their product lines. Intrinsic will work with these companies to provide a proposed mix of consulting, product licensing, and custom engineering services to accelerate the adoption of these technologies into their organizations.

Intrinsic’s booth is located directly within Microsoft’s booth at the entrance to the Las Vegas Convention Center – an honor only 13 other startup companies share, thereby giving Intrinsic exceptional exposure at an event of enormous scope, stature, and importance. As a reference point, this year’s Comdex covers more than 2.2 million square feet of floor area in 3 convention centers, with 2,100 exhibitors and 250,000 visitors. It is the largest event of its kind in the world and has attracted more than 33,000 media who are covering the proceedings.

Intrinsic has given numerous interviews to the international media as well as US and Canadian investment bankers. The Company’s participation at the Comdex Venture Forum has also resulted in promising exposure and developing relations with a number of potential financial and technical partners. Overall, this week long event has already exceeded the expectations of the senior management of the Company in terms of obtaining market exposure as well as providing a validation of its products and technology, and the business model the Company is pursuing.

Intrinsyc is also pleased to announce that its Canadian distributor, Allan Crawford Associates, has received orders for its products from a number of Canadian firms including: BC Hydro, Cominco and Blue Star Batteries. Wizard Information Systems, the Company's European distributor has also started to successfully market and sell products into its markets and is highlighting Intrinsyc's product line at a major European trade show in early December.

Intrinsyc Software Inc. (VSE:ICS) supplies software tools and components for the development of Microsoft Win32[®] based embedded systems. These tools and components enable OEMs to rapidly develop software applications for a wide range of consumer and commercial electronics products that span multiple industries. For more information, contact Intrinsyc at info@intrinsyc.com or World Wide Web Page: <http://www.intrinsyc.com> or call (800) 474-7644.

On Behalf of the Board
