Intrinsic Software and Intel Introduce Mobile Multimedia Reference System

Industry's First 2700G Platform to Support Windows CE 5.0

Vancouver, BC, December 9, 2004: Intrinsic Software International, Inc. (TSX:ICS) today announced the availability of Microsoft Windows CE 5.0 on the new Intel 2700G Multimedia Accelerator Reference System, an Intrinsic Software/Intel co-development initiative. This creates a powerful wireless reference platform for next-generation multimedia handheld devices, and provides an ideal marketing opportunity for Intrinsic Software's licensable mobile software product offerings and professional engineering services.

We are proud to be co-investors in the development and marketing of this exciting platform with Intel, targeted at mobile OEMs, said David Manuel, VP of Mobile and Embedded Solutions, Intrinsic Software. Several of our key customers have already engaged Intrinsic Software based on this reference system for their next generation product offerings.

The Intel 2700G multimedia accelerator reference system with Windows CE 5.0 is designed to deliver all the leadership features required for today's high performance Smartphones and PDAs: a feature rich operating system with powerful application support, high resolution display support, exceptional hardware performance, expandability, connectivity and flexible storage options. This includes the ability to deliver a new level of handheld multimedia capabilities enabled by the Intel PXA27x processor family and the Intel 2700G multimedia accelerator.

Intrinsic Software's expertise and background in Smartphone and wireless PDA development makes them an ideal resource for device OEMs creating new solutions based on Intel XScale technology. Rob McNair, Director of Marketing for Intel's Handheld Graphics Operation.

Matching the Intel PXA270 and 2700G Multimedia Accelerator with the new features and functionality of Windows CE 5.0 is a winning combination for the development of high-intensity, mobile multimedia devices. For more information, please reference Intel's web site at <http://www.intel.com/design/pca/prodbref/300572pb.htm>

Contact Intrinsic Software (www.intrinsic.com) for reference system ordering and availability. Contact an Intel field representative for more information on the Intel 2700G multimedia accelerator (www.intel.com).

About Intrinsic

Intrinsic Software is a mobility software and services company. Our technologies and services make it possible for companies to identify and create innovative solutions that make mobile devices connect and work. Intrinsic Software's unique experience enables companies to deliver winning mobile devices and solutions that build stronger and more profitable businesses.

Since 1996, Intrinsic Software has used its innovations, creativity and technical agility to help over 2000 enterprise customers connect their applications together, and bring more than 200 leading-edge products to market. Intrinsic Software has a strong customer base and has formed solid partner alliances with some of the leading technology companies in the world.

Intrinsic Software is a publicly traded company, headquartered in Vancouver, Canada with additional regional development offices in Bellevue, USA and Birmingham, UK. To find out more about Intrinsic, visit: www.intrinsic.com.

About Intel

Intel, the world's largest chip maker, is also a leading manufacturer of computer, networking and communications products. Additional information about Intel is available at www.intel.com/pressroom

Forward Looking Statements

This press release may contain forward-looking statements that involve risks and uncertainties. These forward-looking statements relate to, among other things, plans and timing for the introduction or enhancement of our services and products, statements about future market conditions, supply and demand conditions, and other expectations, intentions and plans contained in this press release that are not historical fact. Our expectations regarding future revenues depend upon our ability to develop and supply products, which we do not produce today and that meet defined specifications. When used in this press release, the words "plan," "expect," "believe," and similar expressions generally identify forward-looking statements. These statements reflect our current expectations. They are subject to a number of risks and uncertainties, including, but not limited to, changes in technology and changes in the pervasive computing market. In light of the many risks and uncertainties surrounding the pervasive computing market, you should understand that we couldn't assure you that the forward-looking statements contained in this press release will be realized. The Company disclaims any intent or obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or results or otherwise.
