Intrinsic Delivers Soleus Version 1.0

Vancouver, BC – December 21, 2006 – Intrinsic Software International, Inc. (TSX: ICS), a mobility software and services company, today announced it has completed the production release of Soleus™ version 1.0 on time to its development schedule. First demonstrated at the 3GSM World Congress in February 2006, the Soleus™ product is a turnkey software platform that leverages Microsoft® Windows® CE to enable faster, lower-cost consumer handset development.

"Today's R&D milestone represents an important step in our commitment to deliver an innovative software platform for the development of next generation converged communications devices," said Glenda Dorchak, CEO and Chairman of Intrinsic. "A key element of the Soleus™ platform is the flexibility and customization capability it brings to mobile phone manufacturers as they respond to industry pressures to deliver feature-rich handsets to market faster. The timely release of Soleus™ version 1.0 is critical to support our current and future licensees in their plans to deliver feature-rich handheld devices to the marketplace as the services of 3G networks begin to ramp up."

With Microsoft® Windows® CE, Soleus™ is able to rely on a rich, industry-tested architecture and world-class toolset. Intrinsic extends Microsoft® Visual Studio with its UX Designer plug-in, making Soleus™ fully customizable and easy to implement to build unique user interfaces while Windows® CE Platform Builder provides drag-and-drop support for fast operating system configuration.

"Today, the adoption of high level OSs by successful handset brands is a necessary reality," said Shiv Bakhshi, Director of Mobile Technology and Tracking at IDC. "Consumers continue to demand more mobile phone features, better functionality and increased customization on their mobile devices."

As a 'turnkey' software solution, Soleus™ comes pre-integrated with all the telephony essentials, delivering cost and time savings for handset manufacturers. Soleus™ version 1.0 delivers GSM pre-certification and a comprehensive suite of built-in consumer phone applications including alarm, calculator, calendar, call history, camera, contacts, dialer, media player, phone settings, SMS, and theme manager that can be quickly tailored to reduce time to market of the end product.

In addition to built-in applications, Intrinsic partners with third-party independent software vendors to deliver email, browser, multimedia messaging (MMS) and predictive text services to manufacturers. Version 1.0 of the Soleus™ platform also includes a number of recently integrated best-of-breed mobile phone applications:

- Handwriting and voice dialing functionality by Nuance Communications – Nuance's world class Vocon Mobile (voice dialing) and Simpliwrite (handwriting) products enrich the feature phone experience by allowing users to dial numbers using speech recognition and provide handwriting input to the device.
- Gaming products by Implicit Software Solutions Inc. – Implicit Software's games further enrich the feature phone experience by allowing users to enjoy exciting and intuitive games on their phones.
- A comprehensive list of optimized codec's by InterVideo, Inc. – InterVideo's world class Audio and Video codec's enrich the feature phone experience by enabling the playback of popular audio and video files, as well as the compression of recorded audio and video.

Intrinsic has integrated its Soleus™ mobile phone software product with the Intel PXA 270, Freescale i.MX31 and TI OMAP 730/ 850 multimedia applications processors in turnkey, feature-rich platforms to facilitate rapid mobile phone design.

About Intrinsic Software International, Inc.

Intrinsic is a mobility software and services company. Its mobile software products, engineering design services and systems integration expertise help customers make better decisions, improve productivity, and reduce time-to-market. Since 1996, Intrinsic has built a strong customer base and has formed solid alliances with many leading technology companies including Microsoft, IBM, Intel, Philips, Siemens, Symbian, General Electric, Hand Held Products, Texas Instruments and Ford.

Named a Microsoft Gold Partner, Intrinsic has extensive experience with the intricacies of designing, developing and supporting voice and data-enabled handsets built on Microsoft's Windows® CE operating system. Intrinsic is also the creator and licensor of Soleus™, the world's first feature phone software platform based on Windows® CE. Soleus™ offers a new way to build mobile phones, providing pre-integration with leading hardware platforms, all the telephony essentials and pre-integration of the most popular data applications.

Intrinsic is a publicly traded company, headquartered in Vancouver, Canada with additional regional offices in Bellevue, Washington; Singapore; Birmingham, UK and Barbados. To find out more about Intrinsic, visit: www.Intrinsic.com.

Forward Looking Statements

This press release may contain forward-looking statements that involve risks and uncertainties. These forward-looking statements relate to, among other things, plans and timing for the introduction or enhancement of our services and products, statements about future market conditions, supply and demand conditions, and other expectations, intentions and plans contained in this press release that are not historical fact. Our expectations regarding future revenues depend upon our ability to develop and supply products, which we do not produce today and that meet defined specifications. When used in this press release, the words "plan," "expect," "believe," and similar expressions generally identify forward-looking statements. These statements reflect our current expectations. They are subject to a number of risks and uncertainties, including, but not limited to, changes in technology and changes in the pervasive computing market. In light of the many risks and uncertainties surrounding the pervasive computing market, you should understand that we couldn't assure you that the forward-looking statements contained in this press release will be realized. The Company disclaims any intent or obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or results or otherwise.
