PCS WIRELESS, INC. ANNOUNCES FURTHER AGREEMENT WITH MICROCELL 1-2-1

Vancouver, B.C. - March 31, 1995. PCS Wireless, Inc. is pleased to announce that it has signed an updated agreement with Microcell 1-2-1 for the delivery of 1.9 Ghz PCS1900 Platform RAD and MEX/BEX products and services for the Canadian market. The total value of this agreement over 3 years is \$10 Million including equipment delivery and support for dedicated in-building wireless networks as well as wide area Cable-TV based wireless networks.

Further to its December 9, 1994 press release, this agreement allows Microcell and PCS Wireless to transition from their initial agreement for the delivery of \$3.5 Million for CT2+ MEX/BEX products operating at 944 Mhz to the new 1.9GHz wireless PCS bands that Industry Canada has recently proposed. This move by the Government of Canada will allow Microcell 1-2-1 to offer wireless services that will be compatible with similar networks in the U.S..

Ralph Scobie, President & CEO states: "This agreement gives Microcell 1-2-1 a strong competitive advantage in the Canadian marketplace. As technological innovators, they are able to build a cost effective network in record time with excellent coverage and capacity characteristics. PCS Wireless can deliver the distributed antenna systems to make Microcell 1-2-1's 1.9 Ghz nationwide PCS network a reality this year in Canada.

With installations in over 12 countries and patents pending in 25, PCS Wireless, Inc. is recognized worldwide as a leader in deploying wireless Distributed Antenna Array (DAA) telecommunications systems.

On Behalf of the Board

Ralph G. Scobie
President & CEO
