### PCS WIRELESS, INC. ANNOUNCES AGREEMENT WITH AT&T

Vancouver, B.C. - Sept 12, 1995. PCS Wireless, Inc. is pleased to announce that it has received an order from AT&T Network Systems for the delivery of 1.9 GHz CDMA Platform RAD pre-production trial equipment. PCS Wireless, Inc. previously announced that it had received a prototype CDMA RAD order from AT&T on March 9, 1995.

This equipment ordered today from AT&T Network Systems for trials in October substantially conforms to volume production CDMA RAD specifications that has been developed in conjunction with the U.S. cable-based PCS industry over the last 6 months.

Guylain Roy, Director of Sales for PCS Wireless stated: "AT&T performed successful CDMA trials with our RADs earlier this year which helped the U.S. cable-based PCS operators decide on the deployment on CDMA technology for a nation-wide PCS network rollout. A successful conclusion to these latest pre-production equipment trials could lead towards a volume supply agreement later this year".

With installations in over 12 countries, PCS Wireless, Inc. is recognized worldwide as a leader in deploying wireless Distributed Antenna Array (DAA) telecommunications systems for cellular and PCS networks.

On Behalf of the Board
