

2001 Deloitte & Touche

Technology Fast 500

www.fast500.com

**Deloitte
& Touche**

Leading the Way

It's been a tough year for the technology sector, and the companies on this year's Deloitte & Touche Technology Fast 500 are not immune to the effects of the tech correction and the slowing of the U.S. economy. Indeed, some Fast 500 companies have seen their businesses slow significantly in 2001 and are struggling after five years of dramatic growth (the 2001 Fast 500 measures five-year growth through fiscal 2000).

With that said, this year's Technology Fast 500 companies, as a group, found a way to grow even faster than their predecessors. The 2001 Technology Fast 500 averaged a five-year percentage revenue growth rate of 6,184 percent, compared to 3,956 percent for last year's list. The top five companies grew an average of 93,496 percent, compared to 59,367 percent for last year's top five. Revenues for this year's leader of the pack, Internet auctioneer eBay Inc., grew a whopping 115,874 percent, from \$372,000 in 1996 to more than \$431 million in 2000. Last year's kingpin, Primus Communications, Inc., had five-year revenue growth of 71,257 percent, which would have placed it at number seven on this year's list. To make the list at number 500, a company's five-year revenue growth had to top 824 percent, good enough for number 404 last year.

Milestones

This is the seventh year the Technology Fast 500 list has been published. Only two companies have been on the list all seven years: Mountain View, CA-based VERITAS Software Corporation, a software and data management company, and Tampa, FL-based Intermedia Communications Inc., an integrated communications services provider. A spectacular achievement when you consider that each year of dramatic revenue growth serves to raise the bar exponentially for the following year's growth!

List Composition

Public companies make up 62 percent of this year's list, compared to 56 percent last year and an average of 52 percent since the list's inception in 1995.

Industry segments represented were relatively stable from last year, with software companies again leading the way with 221 companies or 44 percent of the list. Notably, given the malaise in the field, communications companies jumped from nine percent to 13 percent of the list. While Internet companies are prominent at the top of the list, as a group, they slid from 17 percent to 15 percent.

Geographical Shifts

After a one-year hiatus, the West resumed its position at the head of the technology class, accounting for 32 percent of the Fast 500, up from 27 percent. California was, by far, the biggest contributor to the list with 132 companies, including two of the top three companies, calling the Golden State home. Canada maintained the momentum from its debut last year with a nine percent showing.

Adding Perspective to the Technology Downturn

The Technology Fast 500 rankings are based on five-year revenue growth, which is not necessarily an indicator of a company's overall health. Many of the companies on the list have experienced rough stretches and many will continue to do so. Still, the companies on the Technology Fast 500 grew fast because the technology they produce make productivity-boosting, life-enhancing products and services, and history shows us that the fastest growing companies will lead the industry into prosperity. For example, this year's top company, eBay, which pioneered the business of online auctions, has revolutionized the world's concept of marketplace. eBay's mission is "to help practically anyone trade practically anything on earth." eBay lists millions of items across thousands of categories from rummage sale bric-a-brac to million-dollar art. Want to buy jewelry, musical instruments, cameras, computers, furniture, sporting goods or tickets? How about a car or boat? They're all available on eBay and the company's proprietary platform facilitates payments and deliveries. It's no wonder that eBay's site processed more than \$5 billion in transactions in 2000.

Research and Eligibility

The Deloitte & Touche Technology Fast 500 list is the result of research on technology companies. Sources for public and private companies that made the list include public company databases, Deloitte & Touche's 22 regional Technology Fast 50 programs in North America and direct nominations.

To be eligible for the Technology Fast 500, a company must meet the following criteria:

1. Be a technology company, defined as a company that develops proprietary technology that contributes to a significant portion of the company's operating revenues, manufactures a technology-related product or devotes a high percentage of effort to research and development of technology.
2. Meet minimum operating revenue requirements:
 - 1996 operating revenues must be at least \$50,000 USD or \$75,000 CD
 - 2000 operating revenues must be at least \$1 million USD and CD
3. Be in business a minimum of five years.
4. Be headquartered in the United States or Canada.

2001 Deloitte & Touche

TECHNOLOGY FAST 500 WINNERS

Top 5

eBay Inc.

Five-Year Revenue Growth: **115,874%**

1

Margaret C. Whitman, CEO

Headquarters: San Jose, CA

www.ebay.com

Nasdaq: EBAY

What started six years ago as a haven for collectables has blossomed into an Internet phenomenon. Today, eBay's 34 million subscribers can buy and sell everything from record albums to airplanes. (In August, a business jet sold for \$4.9 million, making it the highest known sales price for any single item on eBay.) The company expects nearly \$9 billion in goods to be sold via eBay this year. Its 115,874 percent five-year revenue growth rate has placed eBay at the top of the Technology Fast 500 list.

eBay grows by continually evolving. In the last year, it added big-ticket auction categories such as real estate and automobiles. In fact, eBay considers itself the largest Internet auto site. CEO Margaret (Meg) C. Whitman told *Industry Standard* in August, "I think that was pretty surprising to us. This was a Web site based on small shippable items. Cars are hardly small and hardly shippable."

eBay has branched out into non-auction sales as well. A fixed-price sales option is available for nearly

35 percent of auction items. And, a new area called eBay Stores allows merchants to sell their products to eBay users. Steady revenue streams from sources like the Billpoint payment system also bolster the company's shipping services and advertising sales.

Earlier this year, Whitman announced that eBay is aiming for \$3 billion in revenues by 2005. If the company's savvy growth strategies over the last six years are any indication, Whitman may well reach her goal.

InfoSpace, Inc.

Five-Year Revenue Growth: **107,704%**

2

Naveen Jain, CEO

Headquarters: Bellevue, WA

www.infospace.com

Nasdaq: INSP

When Naveen Jain founded InfoSpace in 1996, the idea of conducting business from a cell phone bordered on science fiction. But that didn't stop Jain from targeting the mobile computing industry for InfoSpace's Internet infrastructure services.

Today, leading domestic and international wireless carriers including Verizon, AT&T, Cingular and more than 3,200 Web sites, rely on InfoSpace's platform and applications for consumer services ranging from communication and personal information management products to speech applications.

Meanwhile, InfoSpace's Merchant Services product suite helps millions of traditional and online merchants provide new means of payment processing, promotions, shopping and fraud detection, among other services.

InfoSpace's early penetration into the wireless and commercial Web markets laid the groundwork for the company's impressive revenue growth, which soared from \$199,000 in 1996 to more than \$214 million in 2000.

According to Jain, the company escaped the recent dot-com slump by focusing on the basics that have always been its foundation. "We were one of the first

to point out that the companies that would be successful in this new economy would be the bricks-and-mortar companies that use the Internet as a channel rather than as a replacement for their bricks-and-mortar operation," he says.

InfoSpace expects its customer base to swell once advanced broadband networks emerge. "With enough bandwidth, you won't even need to own a PC," Jain says. "Your cell phone will become a network device that downloads information that is then displayed on the nearest Internet-enabled device."

Excite@Home Corp.

Five-Year Revenue Growth: **91,080%**

Excite@Home

3

Patti Hart, Chairman and CEO

Headquarters: Redwood City, CA

www.home.net

Nasdaq: ATHM

During the Internet boom's early days—when throngs of consumers were frustrated by unstable Internet connections through dial-up modems—the founders of @Home saw an opportunity. They reasoned that the fiber optic cable already going into homes for cable TV could be tapped for faster, "always-on" Internet access. In 1995, @Home partnered with a handful of cable operators and became the first provider to make broadband affordable for consumers. Today, with 3.7 million subscribers, Excite@Home is the world's largest broadband provider.

"We didn't invent the technology pieces, but we were the first to integrate them in such a way that it provided a high-performance service designed especially for mass market deployment," says Milo Medin, an Excite@Home co-founder and its chief technical officer.

In 1998, @Home merged with Excite, an Internet portal and online media business. Although the company has struggled to integrate the two businesses, the steady gains on the broadband side of the business gave Excite@Home a 91,080 percent revenue growth rate from 1996 to 2000.

According to Medin, broadband will continue to penetrate the consumer market thanks to two trends: the growing popularity of home computer networks and the increase in music and video content being delivered via the Internet.

Technology entrepreneurs can take a cue from Excite@Home by maintaining "a laser-like focus on what you do best rather than trying to be a company that does it all," says Medin. But first, he adds, "Build something you have a passion for. Ask yourself, 'Will it change the way people live?'"

On the Horizon: Rising Stars

In technology, the pace of change gets faster every year. That's why we criteria as the Fast 500, except they have been in business less than

PFSweb, Inc.

Five-Year Revenue Growth: **77,924%**

4

Mark C. Layton, Chairman and CEO

Headquarters: Plano, TX

www.pfsweb.com

Nasdaq: PFSW

In the late 90s, companies that would accept nothing less than a sophisticated, well-oiled Web presence turned to PFSweb to outsource everything from call center operations to product shipping.

And the subsequent dot-com slowdown? It hardly slowed PFSweb. The company managed to wrap up 2000 with more than \$86 million in revenues and a 77,924 percent five-year revenue growth rate.

"We went from a new business pipeline abundantly full of new business opportunities to one that was much smaller by the time we got to the end of 2000. It was a hard job in the face," recalls CEO Mark Layton.

"We had to completely change our marketing and sales focus back to our roots: selling to Fortune 500 companies and to vertical industries such as technology manufacturing, pharmaceuticals, consumer goods and government."

The global trend toward outsourcing as a cost-effective alternative to building and maintaining e-business capabilities in-house is expected to aid PFSweb's continued growth. According to Layton, his company will continue to have an edge over other outsourcers because PFSweb offers a single source for e-business services. "We do it all at a world-class level," he says.

PFSweb is the creator of Entente SuiteSM, which enables companies with little e-commerce infrastructure to speed their time to market and minimize resource investment and risk.

Layton urges aspiring e-business entrepreneurs to not be deterred by naysayers. "There is a lot of negative sentiment about the world of Internet businesses today because of the tremendous rise and fall during the last part of the 90s," says Layton. "Yet the capabilities with this technology are phenomenal, and there are great advantages for our society to be derived from it."

Mascon Global Ltd.

Five-Year Revenue Growth: **74,900%**

MASCONTM

5

Nandu Thondavadi, Managing Partner and CEO

Headquarters: Schaumburg, IL

www.masconit.com

Mascon Global knows how to fill a void. Once its clients make the decision to downsize their information technology (IT) departments, the first call they make is often to Mascon.

Mascon is a developer of manufacturing software including material requirements planning, inventory management, production planning, process control, and sales and financial management software.

"It's one thing to lay off thousands of people, but what happens to the work they're doing? The company needs to provide continuing core support for existing products. We help them take significant costs out of the system

by moving most of the production, maintenance and system operations and enhancements to Mascon," says CEO Nandu Thondavadi.

In addition to stepping in after layoffs, Mascon also serves as a software development arm for Fortune 500 companies. Under a joint venture with MasterCard, for example, Mascon develops and maintains clearing software that is offered to MasterCard's 23,000-member banks.

Much of the work is done at a development center in Chennai, India, that Mascon established exclusively for the MasterCard program. That international link is a key strategic advantage for Mascon, which has other software

development centers in India. "Our clients get an extended IT group. With the 12-hour time difference in India, we can provide 24/7 support," says Thondavadi. The company also has facilities in Mexico and throughout the United States.

Mascon, whose client list includes Citibank, General Electric, Merck and Wal-Mart, had a five-year revenue spurt of nearly 75,000 percent. According to Thondavadi, "It took some time to experiment and do some course correction, but we've succeeded by understanding the pain of the customer and turning that into a solution strategy."

have added a category to recognize technology companies that are quickly making a name for themselves. They have met the same five years, but at least three years. The Rising Star list is based on three-year growth from 1998-2000.

2002 Technology Fast 500 CEO Summit

May 8–10, 2002

"One of the things you don't get when you're in the office running a company is an opportunity to meet with others who face the same problems you do. One of the take-aways from the CEO Summit is the opportunity to share similar problems with my peer group and bring that learning back to Hybrid."

Michael Greenbaum, President and CEO
Hybrid Networks Inc.
2001 CEO Summit Attendee

The Deloitte & Touche Technology Fast 500 CEO Summit is an exclusive gathering of top executives from the fastest growing technology companies in North America and across the globe. The Summit provides a unique interactive setting in which delegates learn from each other's experiences and from a slate of presenters that represents the best minds in business and academia.

Attendance at the CEO Summit is by invitation only and is open to executives from current and prior year Fast 500 companies and international Fast 50 programs.

The fourth annual Deloitte & Touche Technology Fast 500 CEO Summit will be held May 8–10, 2002, at the Breakers Resort in Palm Beach, Florida. For more information, please visit www.fast500.com.

About Deloitte & Touche's Technology & Communications Group

The Technology & Communications Group is composed of professionals who have a wealth of experience serving technology and communications companies throughout the world in areas including Internet, software, semiconductors, cable, media and publishing, communication utilities, networking, computers and peripherals, and related industries. These specialists understand the challenges that technology and communications companies face throughout all stages of their business growth cycle, and are committed to helping them succeed. Deloitte & Touche is a leader in providing strategic, financial, operational, and information technology assistance to its technology and communications clients.

About Deloitte & Touche

Deloitte & Touche LLP, one of the nation's leading professional services firms, provides assurance and advisory, tax, and management consulting services through 30,000 people in more than 100 U.S. cities. The firm is dedicated to helping our clients and our people excel. Known as an employer of choice for its innovative human resources programs, Deloitte & Touche has been recognized as one of the "100 Best Companies to Work For in America" by *Fortune* magazine for four consecutive years. Deloitte & Touche is the U.S. national practice of Deloitte Touche Tohmatsu. Deloitte Touche Tohmatsu is a Swiss Verein, and each of its national practices is a separate and independent legal entity. For more information, please visit Deloitte & Touche's web site at www.us.deloitte.com.
